Joe Sample | November 18, 2024 | Confidential

Core Personality Insights

Introduction

Overview of the 16pf

The 16pf Questionnaire is a comprehensive measure of adult personality. Its results can be applied to many situations because it provides a full picture of the individual by measuring personality both broadly and deeply. This unique level of insight is supported by more than 60 years of research and application.

Overview of the 16pf Competency Profile & Interview Guide

Users need considerable training and experience to accurately interpret the scores of the 16pf Questionnaire. To make this valuable information more accessible, the 16pf Competency Profile & Interview Guide provides the respondent's scores on a comprehensive framework of 20 common job competencies, and questions to explore these further in an interview. The Report is written in straight-forward, business language. Each competency is described briefly in its own section.

These competencies are based on a combination of empirical research and many years of organizational consulting experience.

Use of the Report

Because the statements in this report are automated, they should be viewed as hypotheses to validate against other sources of data (e.g., interviews, work samples, simulation exercises, biographical data or references).

Keep these points in mind when using this report:

- ▶ You should focus on the competencies most relevant to the role in question. Identify the most important 4-5 competencies and concentrate on them.
- ▶ The results reflect the respondent's description of their own personality and behavior. They may not completely match the way other people see the individual. The accuracy of the results depends both on the respondent's openness in answering the questionnaire and upon their level of self-awareness.
- ▶ Often, the value of personality assessment is in comparing a respondent to a larger population. These results describe how the person's profile corresponds to other people who have completed the questionnaire.
- ▶ The report describes the respondent's likely style. It does not directly measure foundational skills or knowledge. As a result, the statements should be compared to other information about the individual.
- ▶ The prediction of potential is based on studies of the relationship between a variety of competencies and 16pf personality characteristics. However, each person may have a different way of demonstrating the competency. Use additional information to confirm or disconfirm the predictions for this individual.

The results of the questionnaire are generally valid for 12-18 months after completion. They may be less useful if an individual undergoes major changes in their work or life circumstances.

Structure of the Report

The 16pf Competency Profile & Interview Guide comprises the following sections:

Response Style Indices

This section provides information on how the respondent has answered the questionnaire. It allows the user to review and generate hypotheses about the respondent's test taking attitude.

Norm Group

The population against which respondents of the 16pf are compared. Using a norm group means a respondent's scores are considered in the context of the type of group they might belong to, rather than in isolation.

Overall Summary

In this section, a graphical summary presents the respondent's likely performance on all competencies on a 1-5 scale. A score of 1 is considered very low and 5 is considered very high. Remember to focus on the 4-5 most important competencies.

Competency Results & Interview Guide

This section explores each competency in detail. The following information is provided:

▶ **Overview of the Competency**

▶ **Indicators**

A description of how closely the respondent's profile aligns with the requirements of the competency. The degree of alignment is indicated by a symbol at the side of each indicator from the 16pf:

- +
 -
 -
- for when the results of a 16pf factor suggest a positive relationship with the competency
- for a relationship which appears negative
- when the 16pf result is moderate or balanced between a positive and negative relationship

▶ **Interview Questions**

This section offers a competency-based interview guide. Two standard interview questions are presented for all respondents in each competency. Below the standard questions are probing questions that vary according to the respondent's 16pf profile. These questions allow interviewers to explore areas where the respondent may need to compensate for a potential gap between their 16pf profile and the competency requirements.
